What We Do

FIRST AID TRAINING

- »» HLTAID001 Provide CPR
- »» HLTAID002 Provide BLS
- »» HLTAID003 Provide First Aid
- »» HLTAID004 Provide First Aid Response → education setting
- »» HLTAID005 Provide first aid in remote situations
- »» HLTAID006 Provide advanced first aid
- »» HLTAID007 Provide advanced resuscitation
- »» HLTAID008 Manage first aid services and resources
- »» HLTSS00027 Occupational First Aid Skill Set - (OFA)

EMERGENCY RESPONSE TRAINING

- »» Emergency First Responder (EFR)
- »» HLT21015 Certificate II in Medical Service First Response
- »» OFA + HLT21015 Combo program

PROFESSIONAL DEVELOPMENT WORKSHOPS

- »» **A - Airway** management
OPA + NPA + Supraglottic airway
- »» **B - Breathing** – oxygen administration
Use of a vented chest seal
- »» **C - Circulation** – Cardiac arrest protocols
Stop the Bleed® workshop
Rapid I.V Cannulation workshop
Intraosseous access
- »» Operating in a Medical Centre (Clinical skills)

OTHER

- »» STOP the BLEED Workshop (international certification)
- »» TACTICAL First Aid
- »» Injury management support services incorporating metro transport
- »» Site protocols –implementation and education
- »» Emergency response medical skills
- »» Moulage and Simulated exercises (TraumaSim)

Perform Peripheral Intravenous (IV) Cannulation

WORKSHOP

Peripheral intravenous (IV) cannulation is a foundation skill for a broad range of clinicians working in health care. This workshop is focused on the pre-hospital care provider (Medic/Paramedic).

This workshop will build on skills and knowledge of the Medic/Paramedic and is not suitable for individuals who are not qualified in IV Cannulation as part of their qualification and/or certificate to practice.

The workshop is designed from national and international best practice with a focus on 'Rapid IV Cannulation' using techniques originally designed by the military and adapted to the Australian pre-hospital care environment.

Training will be performed face-to-face in a typical classroom and will involve simulation. The workshop will be contextualised to meet the needs of a workplace including the use of site specific cannulas (*please ensure training units are available on the day if applicable*).

Workshop title	Perform Peripheral Intravenous (IV) Cannulation
Workshop Duration	6 - 8 hours
Workshop cost	\$350 per student
Minimum Onsite	Minimum 6 students or equivalent fee charged
Maximum Onsite	Maximum 12 students per workshop
Certification	Statement of Attendance
Pre-requisite	RN, EN, Cert IV level Medic with cannulation skills, Paramedic
